RANGE REGAULATIONS

The following changes were made. For further explanation, see the Safety Committee hearing minutes from October, 2020, specifically the report given by the Big Bore Range Chairman, Jason Myskow.

Page 10, Section D:

Shooters who wish to go forward and score/change targets will unload and bench all firearms with the actions open **and magazines out of the magazine feed** and stand behind the Red Firing Line and give other shooters the opportunity to finish their strings. When other shooters recognize that shooters are waiting behind their firing points, those still firing should conclude their string in a reasonable time.

Page 10, Section F:

~~Holster work will NOT be done on the Big Bore Range if there are any rifle shooters present. Rifle shooters will have priority on the Big Bore Range. When drawing from a holster on any range, the firing line will be forward of the benches, off of any concrete surface, and out in the dirt. At NO time will holster work ever be done from behind the benches or on a concrete surface.~~

No handguns are allowed on the Big Bore range. Exceptions include black powder handguns, hunting revolvers (Smith and Wesson 460, Smith and Wesson 500, 454 casull and similar calibers), and handguns that shoot rifle cartridges. Additionally, no shotguns are allowed on the Big Bore range, except shotguns using slugs.

*This change was presented at the 11/11/20 Membership meeting and was voted on and approved by the membership
